

Monopolies on media ownership must not be allowed, for the good of the American public. There are so many negative implications of allowing corporations to own too large of a share of the country's media outlets. The Corporate-Government alliance evidenced in the Bush administrations policies is our warning of dire consequences to come if this trend is not reversed. A government alliance with media corporations is the equivalent of State run media, which I don't think anyone would defend. Please do not allow this situation to occur.
